Subject: SJWP update
Date: Wednesday, February 24, 2016 5:22:35 PM

Spoke to Gary about SJWP this afternoon.

- 1) He confirmed that he would like our team to place all of the sampling devices (shallow and deep). We are shooting for a date near April 4 (Gary's request). I will send an official availability request in the next couple of days.
- 2) Gary has determined that a more complete survey of the cap is needed. He and I discussed a few survey methods today. He will either request that our team complete the survey or provide oversight of the RP conducting the survey. Our team is cautious about providing oversight of the RP. I'll include more information about this in the 'availability request' email.
